Some hog producers have been selling some very light pigs at the auction markets. These pigs aren't bringing much money and they must go to slaughter.

Pig producers are advised to take a strong look at the feeder pig sales. There is one held the first Thursday each month in Farmville.

At the August sale 69 pound number 1 pigs brought $16.20.

Have you ever seen a pound-thirteen ounce Bluegill? It was caught in Appomattox County by an Appomattox fisherman. This must set some kind of county record. The fish measured 12 inches long and 12 1/2 inches in circumference.

If you have two sprayers, one for herbicides and one for insecticides, you're going to put the wrong material in the wrong sprayer unless you're real lucky.

There's on the market a material called Darco activated carbon that is suppose to remove things like 2,4-D from a sprayer. The literature says it will remove as little as one ppm.

I tried it and it worked for me.

Fall is a good time to plant forsythia. It's very hardy and it's one of the earliest flowering shrubs to appear in the spring.

There's a wide variety within the specie. Some varieties grow eight feet high, while others will grow a foot high. Some produce small yellow flowers while other s have flowers measuring two inches in diameter.

Why not plan now for a colorful spring.

Soil Combats Pollution

by R. E. McClenny, Jr.
Soil Conservationist

The ultimate goal for disposing of garbage and pollutants that spoil our environment is to recycle or use the materials over again. Until these waste products can be recycled, the cure is likely to be the very earth we walk on -- most people call it just plain "dirt". The concept of cleaning dirt with dirt may seem a bit odd. But soil, the term used by our soil scientists, has an amazing capacity to recycle many of the most troublesome wastes of today's society.

Controlled disposal of wastes from animals, humans and plants can actually improve soil structure and productivity. Disposal of such waste must be guided by a scientific choice of sites based on the particular kind of soil and watershed involved. Sites vary in their ability to absorb pollutants without creating a hazard or nuisance.

Open dumps are very unsanitary. Such dumps breed harmful insects and rodents. Drainage from these dumps pollutes streams, while obnoxious odors pollute the air. Worst of all may be the unattractiveness of a dump.

A survey conducted several years ago by the Bureau of Insect and Rodent Control located 46 open dumps along the roads in Appomattox County. Certainly, nothing to attract tourist.

Until better use can be made of our waste paper, metal, glass and other garbage, the sanitary land fill is the best way to dispose of it. Even the sanitary land fill must be located in soil that has the capacity to filter the pollutants or streams and underground water can be polluted.

Future proposals for Appomattox County include better sanitary land fills. Open dumps are everybody's business - lets do away with them.

79 Places Support Jaycees

Appomattox County Jaycee Phillip Scruggs is shown above announcing for a local business at Radio Station WFLO, will help support the Boy Scouts and Girl Scouts, Appomattox County Youth Association, etc.

The Appomattox County Jaycees would like to take this opportunity to thank each of the 79 businesses in the Appomattox County area that so graciously supported their 1971 Radio Day project. Your support as in the past, will enable the Jaycees, through their many ideas and man-hours, to help make Appomattox County a better and safer place in which to live, work and play.

The organization is made up of young men between the ages of 21 and 36. The Jaycees have two main purposes which are leadership training and community development. Both of these purposes were fully attained in this project. A great deal of leadership training was gained by those Jaycees who worked on this project through their personal sales contacts, writing of the advertisements and radio announcing. A great deal of community development was also derived from this project. The Jaycees will purchase equipment for the area rescue squads and fire departments in the coming year. The Jaycees are charter members beginning 2nd from left: Miss Kate Davidson, Mrs. Irby Wheeler (Eloise), Mrs. Elsie Thornhill, Mrs. Annie Horsley, Mrs. Elsie Caldwell (standing) and Mrs. Tilden Lee, seated (far right). Members of the Wreck Island club and friends of the club membership are all invited to bring a covered dish for the supper and to help the club celebrate. This is the oldest club in the county in terms of years of organiation. These charter members, younger in years, if course, at the time of the organization, say they are really looking forward to Friday. Charter members unable to be present for the picture include Mrs. G. P. Jennings, Mrs. Clyde Carson and Mrs. E. L. Chick ("Ruby").

On Aug. 20 about 4:30 p.m. fire broke out and completely destroyed the home of Mr. and Mrs. Charles H. Canada. They were not able to save anything, only some items of wash that were on the clothes line. This is a great lost to the couple and they will appreciate any act of kindness from friends.

On Aug. 15th the family reunion was pleasantly enjoyed by friends and relatives of the family of Mr. and Mrs. Canada. Miss Andrewnette Nance, a great niece, gave the occasion. Rev. A. D. Nance gave the reunion prayer. Mrs. Grace Walker and Mrs. Bertha King was assistants to the occasion.
